## EDUCATION

**University of Maryland, College Park** (Dual-degree)  
B.S. Computer Science (Major GPA: 3.56)

**Aug. 2018 – May 2022**  
B.A. Economics (Major GPA: 3.64)

## EXPERIENCE

### Clad (YC W23)

*Software Engineer*

New York, NY

**Nov. 2024 – May 2025**

- Led full-stack feature development for a Remix/React platform backed by PostgreSQL, streamlining subcontractor compliance, inventory, and field data capture; reduced administrative costs for telecom construction customers by hundreds of thousands of dollars annually across accounts.
- Designed a multi-tenant compliance rules engine and scheduler to detect expiring documentation against client-specific policies; implemented alerting and structured remediation workflows with audit trails, eliminating manual tracking and shortening compliance cycle time.
- Built a mobile-friendly, offline-tolerant photo capture & upload flow with background retries and integrity checks for job sites; scaled to high weekly upload volumes without data loss.
- Improved analytics dashboard load times by **90%** via optimistic UI, server-side filtering, and targeted data caching; enabled faster decision-making for operations teams.

### Capital One

*Senior Associate Software Engineer (Delivery Experience)*

New York, NY

**Aug. 2023 – Oct. 2024**

- Developed load balancing for an automated PR creation tool (Java, Spring Boot, Angular) handling Docker image and library updates; reduced peak load on the enterprise GitHub instance by **40%** during release surges.
- Led team disaster recovery simulations, coordinating migration of application services between AWS regions within a 10-minute RTO target.

*Associate Software Engineer (Cloud Infrastructure Automation)*

**Aug. 2022 – Aug. 2023**

- Modernized legacy internal tooling by leading a migration from JavaScript to **TypeScript** and from Webpack to **Vite**, with upgrades to **React Router v6** and **Vitest**; improved build reliability and developer experience, saving **hundreds of engineer hours annually** in debugging and CI iteration.
- Built a full-stack web app (React, Express, TypeScript) automating provisioning of AWS resources, reducing manual setup time from hours to minutes for infra teams.
- Shipped an internal metrics dashboard (Chart.js, AWS) visualizing resource utilization and compliance; improved transparency and reduced turnaround time for provisioning requests by **15%**.

### Clarissa.ai

*Co-founder, CTO*

New York, NY

**Apr. 2020 – Aug. 2020**

- Led a team of 5 engineers building clarissa.ai, an intelligent medical assistant with symptom recognition (NLP), illness tracking/triage, and a patient-doctor connection platform.
- Architected and deployed a full-stack web application with a React.js frontend and a RESTful Flask API.

### University of Maryland

*Head Teaching Assistant: Object-Oriented Programming I & II*

College Park, MD

**Aug. 2021 – May 2022**

*Head Instructor: Building Web Apps with Python and Flask*

**Jan. 2020 – May 2022**

*Teaching Assistant: Global Economics, Engineering Ethics, Object-Oriented Programming*

**Aug. 2019 – May 2021**

### The Depository Trust & Clearing Corporation

*Infrastructure Engineering Intern*

Jersey City, NJ

**May – Aug. 2019**

- Built a Python/Flask web dashboard enabling support admins to execute scripts and monitor logs on 100+ remote servers from a centralized interface.
- Hardened log monitoring shell scripts to cut missing-log incidents and eliminate recurring 3-hour report delays.

## SKILLS

**Languages:** TypeScript/JavaScript, Java, Python, Golang, HTML, CSS, C, Bash, Ruby, OCaml, x86 Assembly, SQL,  $\LaTeX$

**Frameworks:** Remix/React, Express, Flask, FastAPI, SQLAlchemy, Pytest, Angular, Selenium, Spring Boot, JUnit

**Tooling:** Vite, Vitest, Chart.js, Git, Jenkins, Docker, Jira    **Cloud:** AWS (Elastic Beanstalk, EC2, Lambda, DynamoDB, RDS, ECS)

## LEADERSHIP EXPERIENCE

**Bitcamp** — University of Maryland's Flagship Hackathon

College Park, MD

*Director of Internal Sponsorship and Finance*

**Jun. 2019 – Aug. 2021**

Led fundraising and finance for Bitcamp 2021; primary point of contact for UMD-affiliated corporate partners.

## AWARDS

**University of Maryland, College Park:** President's Scholar, CMNS Dean's List (Dec. 2018 – May 2022)

**HackRU 2019 (Rutgers University):** Overall Winner, Best AI Hack — *Moody* (facial-expression mood logging)
